

What is Refacing?

Refacing is a cost effective way of changing the appearance of your kitchen with out the mess or hassle of replacing! Once you have chosen a custom made door style, and color, you will see the transformation of your kitchen in 4 easy steps.

- 1.** We take off the old outdated doors and drawer fronts, and hardware, and discard them.
- 2.** We prepare the sides and face frames of your existing cabinets.
- 3.** We re-do the sides, and the face frames of your cabinets to match your new custom made doors and drawers fronts.
- 4.** We install new doors with new heavy duty self closing hinges and drawer fronts, we install your new hardware

About our Company

We are a company that prides ourselves on great customer service and quality products. We have 30 years in the industry and our professional Kitchen Designers walk you through the process every step of the way. Our award winning installation department is second to none; we are on time and we get your project done in a timely manner. All of our employees are drug tested, and given background checks, so you may feel safe and secure. You can be assured that you are receiving quality products with our Life time

warranty on labor and materials. With our Low Price guarantee we will meet or beat any competitors price if they present you with the same products and quality installation at a lesser price. Making you another satisfied customer is our number one goal! Let us show you how we make kitchens look beautiful!
